SECTION 4: First aid measures

· 4.1 Description of first aid measures

· After inhalation:

Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist.

· After skin contact:

Remove uncured foam using a piece of cloth and an unagressive solvent, e.g. ethanol. Wash your hands and the cleaned skin surface using soapy water. Cured foam can be removed mechanically with the use of a brush, soap and plenty of water. Use protective cream after skin surface has been cleaned.

· After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.

· After swallowing:

Do not induce vomiting; call for medical help immediately.

- Rinse out mouth and then drink plenty of water.
- · 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available.
- · 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
- Suitable extinguishing agents:
- Carbon dioxide.

Fire-extinguishing powder.

Foam. Water sprav.

Use fire extinguishing methods suitable to surrounding conditions.

- · For safety reasons unsuitable extinguishing agents: Water with full jet.
- **5.2 Special hazards arising from the substance or mixture** Can form explosive gas-air mixtures.
- Formation of toxic gases is possible during heating or in case of fire.
- · 5.3 Advice for firefighters

· Protective equipment:

Wear fully protective suit.

Wear self-contained respiratory protective device.

· Additional information Cool endangered receptacles with water spray.

SECTION 6: Accidental release measures

 6.1 Personal precautions, protective equipment and emergency procedures Keep away from ignition sources. Wear protective clothing. Do not inhale vapour/spray. Ensure adequate ventilation.
 6.2 Environmental precautions: Do not allow to enter sewers / surface or ground water.
 6.3 Methods and material for containment and cleaning up:

Uncured foam adheres easily, hence it should be removed with caution. Remove instantly using a piece of cloth and solvents, e.g. acetone, alcohol. Remove cured foam mechanically. Dispose contaminated material as waste according to section 13. Ensure adequate ventilation.

· 6.4 Reference to other sections See Section 13 for disposal information.

SECTION 7: Handling and storage

 7.1 Precautions for safe handling Open and handle receptacle with care. Do not pierce or burn even after use. Use only as directed on the label. Do not mix with any other chemical products. Ensure good ventilation / exhaustion at the workplace. 	
 Information about fire - and explosion protection: Do not spray onto a naked flame or any incandescent material. Keep ignition sources away - Do not smoke. Protect against electrostatic charges. Pressurised container: protect from sunlight and do not expose to temperatures exceeding 50°C, i.e. electric lights. Do not pierce or burn, even after use. 	
 • 7.2 Conditions for safe storage, including any incompatibilities • Storage: • Requirements to be met by storerooms and receptacles: This product is subject to regulations governing the storage of highly flammable aerosol products. Storage rooms should be equipped with heat and smoke detectors. Electrical equipment should be explosion-proof. Store in a cool location. Observe official regulations on storing packagings with pressurised containers. 	
 Information about storage in one common storage facility: Do not store together with acids. Do not store together with alkalis (caustic solutions). Store away from reducing agents. Store away from oxidising agents. Store away from foodstuffs. Store away from plastic, rubber, aluminum, light-metals.

 Further information about storage condit 	ions:
Store receptacle in a well ventilated area.	

Store in vertical position in closed original containers. Store at temperature from $+5^{\circ}$ C to $+30^{\circ}$ C. Protect from frost. Store under lock and key and out of the reach of children. Protect from heat and direct sunlight. · 7.3 Specific end use(s) No further relevant information available.

· Individual protection measures, such as personal protective equipment
General protective and hygienic measures:
Keep away from foodstuffs, beverages and feed.
Immediately remove all soiled and contaminated clothing.
Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin.
Do not inhale gases / fumes / aerosols.
· Respiratory protection:
In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure
use self-contained respiratory protective device.
· Hand protection
Protective gloves
EN 374 The glove material has to be impermeable and resistant to the product / the substance / the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

Polyethylene gloves.

Recommended thickness of the material: ≥ 0.02 mm.

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

Short-term contact ≥10 min (EN 374)

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Additional ecological information:

· General notes:

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water.

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

· Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system. Dispose of in a safe manner in accordance with local / national regulations.

Do not allow to enter surface or ground water.

Assigning a code from the waste catalogue depends on the sector, in which the user operates, as well as on arrangements made between the waste generator and a competent environment protection department.
